

Request for Proposal San Mateo County Smart Corridor Program System Integrator Support

Question Response

Date: 12/4/2012

Responses are Red

1. Page 9 – 6th paragraph – “This Contract is for system integration support only with physical installation of ITS equipment and communications network.” Please provide additional explanation. Is SI responsible for installation of hardware?

“This Contract is for system integration support only with physical installation of ITS equipment and communications network” shall be revised to the following: “This Contract is for system integration support only with physical installation of ITS equipment (Cabinets, conductors, sign panels, CCTV cameras, etc.) and communications network (fiber optic cables, signal interconnect cables, etc.) done by others.”

“The System Integrator could be responsible for the mounting of electronic devices (switches, routers, encoders, and controllers) and plugging in associated cabling (network patch cables, power cable) inside field cabinets or telecommunications room.”

2. You are requesting that all pages in our response must be on 8.5x11 sheets with no foldouts. Some of our table may not fit conveniently on this size page. Will you permit the use of alternate fonts and font sizes to facilitate tables?

Yes, all information shall be reasonably legible.

3. Please provide a list of the organizations which make up the Smart Corridor Project Team.

Project Team(s) has not been finalized at this time.

4. Task 3.8, Attachment A – How was the not to exceed figure of 1200 hours calculated?

The figure is based on assumptions regarding expected workload of Caltrans and City staff and other contractors. The maximum hours was provided to give prospective bidders a basis for approximate costs and potential workload.

5. Will companies which were contracted to develop all of the materials provided as reference documents be allowed to submit a proposal for the Systems Integration RFP?

Only firm(s) with direct involvement with the development of this RFP will not be allowed to submit proposals.

6. Will the company which was awarded the work for Project 1 – San Mateo Demonstration Project – be allowed to submit a proposal for the Systems Integration RFP?

Only firm(s) with direct involvement with the development of this RFP will not be allowed to submit proposals.

7. Will the KITS signal system provider, which was awarded as part of Project 4 – Provision of centralized traffic signal system including traffic signal controllers – be allowed to submit a proposal for the Systems Integration RFP?

Only firm(s) with direct involvement with the development of this RFP will not be allowed to submit proposals.

8. Is more information available on the expected schedules for the remaining construction projects that are still to be bid and awarded (expected start dates, # of signals included, expected durations)?

No

9. Please indicate how many business days are required by C/CAG's member agencies and stakeholders to review draft and draft final versions of document submittals?

10-20 Business Days (Typical)

10. Please indicate how many member agencies and/or stakeholders will participate in the review of document deliverables?

Project Team(s) has not been finalized at this time. Depending on deliverables, list of reviewers may vary.

11. Please add five (5) business days extension to submittal due date to allow for sufficient time to react to responses to questions and clarifications.

We will not do that.
